**Subject:** RE: Upper Animas Fish survey

Hi Jim

Thanks for keeping us on your calendar and I'm definitely interested in helping but not sure about availability. That is the week we are sampling the Animas, as well as participating in a couple meetings in Silverton. Our crew will be going into the canyon that week so we may be limited getting everyone access unless we do some careful planning. This may take some back and forth with the D&S Train folks as well.

As we discussed, I will let you know what I find out from D&S next week and get back to you.

We have dealt with several people to get a lift into the canyon due to turnover but Evan has been there for a while and been very supportive.

**Subject:** Upper Animas Fish survey

Hi Dan and Robyn,

The upper Animas River is on my "to do" list this year because we could not get your request done with last year's high water. I have The week of Sept. 22nd on my calendar to get the following sites surveyed: Teft Spur (just upstream of Cascade Ck conf.), Elk Park (just downstream of Elk Creek), the "A72" Gauging station just downstream of Silverton, and a station on the Animas River near Howardsville (Just upstream of Cataract Gulch). I wanted to coordinate those dates with you if you are interested (or available) to help with the project. Also, I was wondering if you still had a contact person with the Durango and Silverton Train that you were using last year you could pass along to me.

Thanks,

Jim
